

ER-1029/2000

All Hidral products and services are guaranteed by an AENOR (Spanish Association for Standardisation and Certification) certificate. This document certifies that Hidral's Quality System is managed, designed and implemented in accordance with International Standard ISO 9001:2000. It is also an extra guarantee for its customers, who know they can trust its commitment and expertise.

## On the way up

---

We are a leading company in the elevation and accessibility sector which designs and manufactures all types of lifting solutions for passengers and goods. Since we started in 1975, we manufacture exclusively for lift professionals that rightly seek maximum quality and safety for maintenance personnel and end users alike.

Since our very beginning, at Hidral we have embarked on an upwards path, guided by objectives of excellence, research and development and a thorough concept of service that runs from the initial consultancy through to our aftersales service. The technological development of our products and customised engineering projects are among our core activities, where the main goal is to satisfy the needs of the market. An R&D&I team of over 25 people, working with the latest technologies in creation, checking and monitoring instruments, ensures the inclusion of safety and reliability.

The outcome of this policy is in Hidral we enjoy a solid and distinguished position on the global market. With a production capacity of up to 4.500 lifts per year, we currently market our products in over 80 countries and 70% of our total revenue comes from sales on international markets.

With an ambitious internationalization project to achieve greater coverage for our customers, we currently have over 20,000 m<sup>2</sup> of facilities spread over two factories in Seville (Spain).

We also have sales offices in Moscow (Russia), Paris (France), Beirut (Lebanon), Indaiatuba (Brazil), London (UK) and South Carolina (USA).

However, our greatest asset is without a doubt the members of our team, highly qualified professionals from different multidisciplinary areas.

## You trust Hidral for:

### Wide range

We design all types of lifts and lifting platforms for passengers and goods, we adapt to the requirements of every customer.

We manufacture exclusively for lift professionals, these are customers demanding the highest safety and quality.

### Experience

40 Years' sector experience.

### Vertical Integration

We integrate all the manufacturing phases, guaranteeing the highest quality and cost control with minimum delivery deadlines.

### Internationalization

Our products are present in more than 80 countries worldwide.

### Great productive capacity

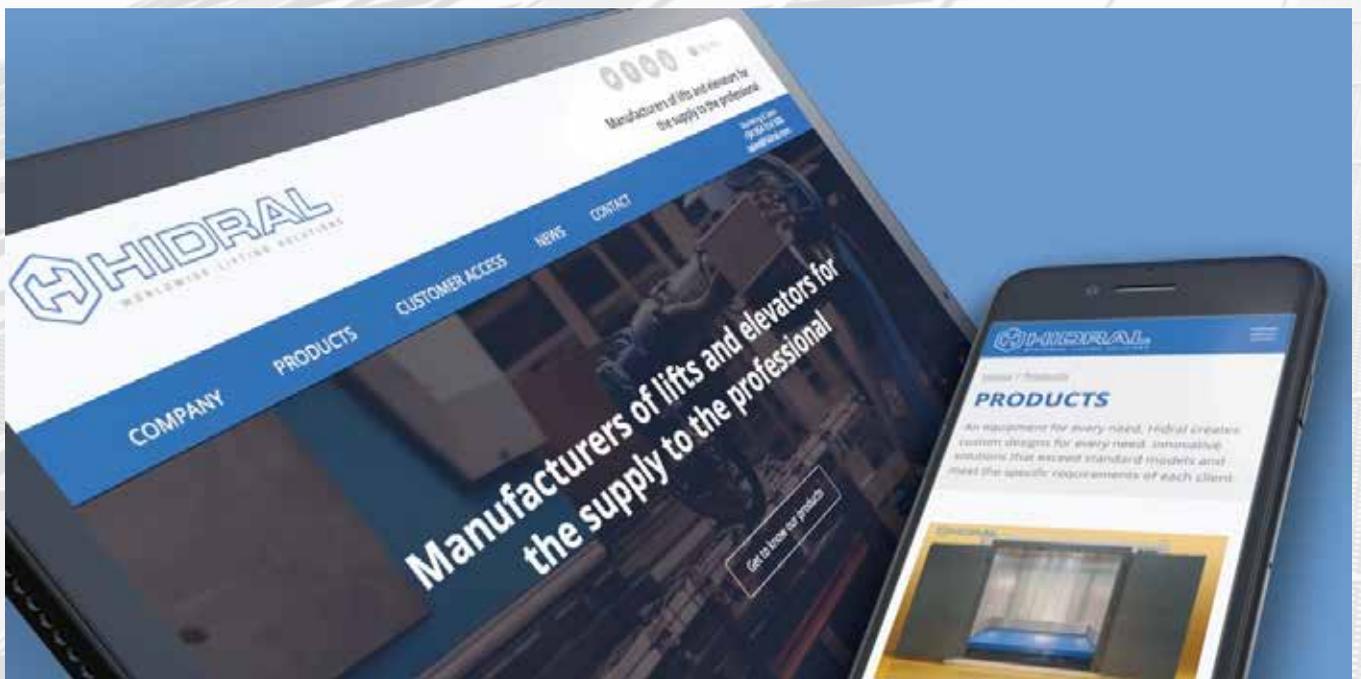

We have a production capacity of up to 4,500 lifts per year.

### R&D&I

We carry out continuous improvement processes and invest in R&D&I.

### Service

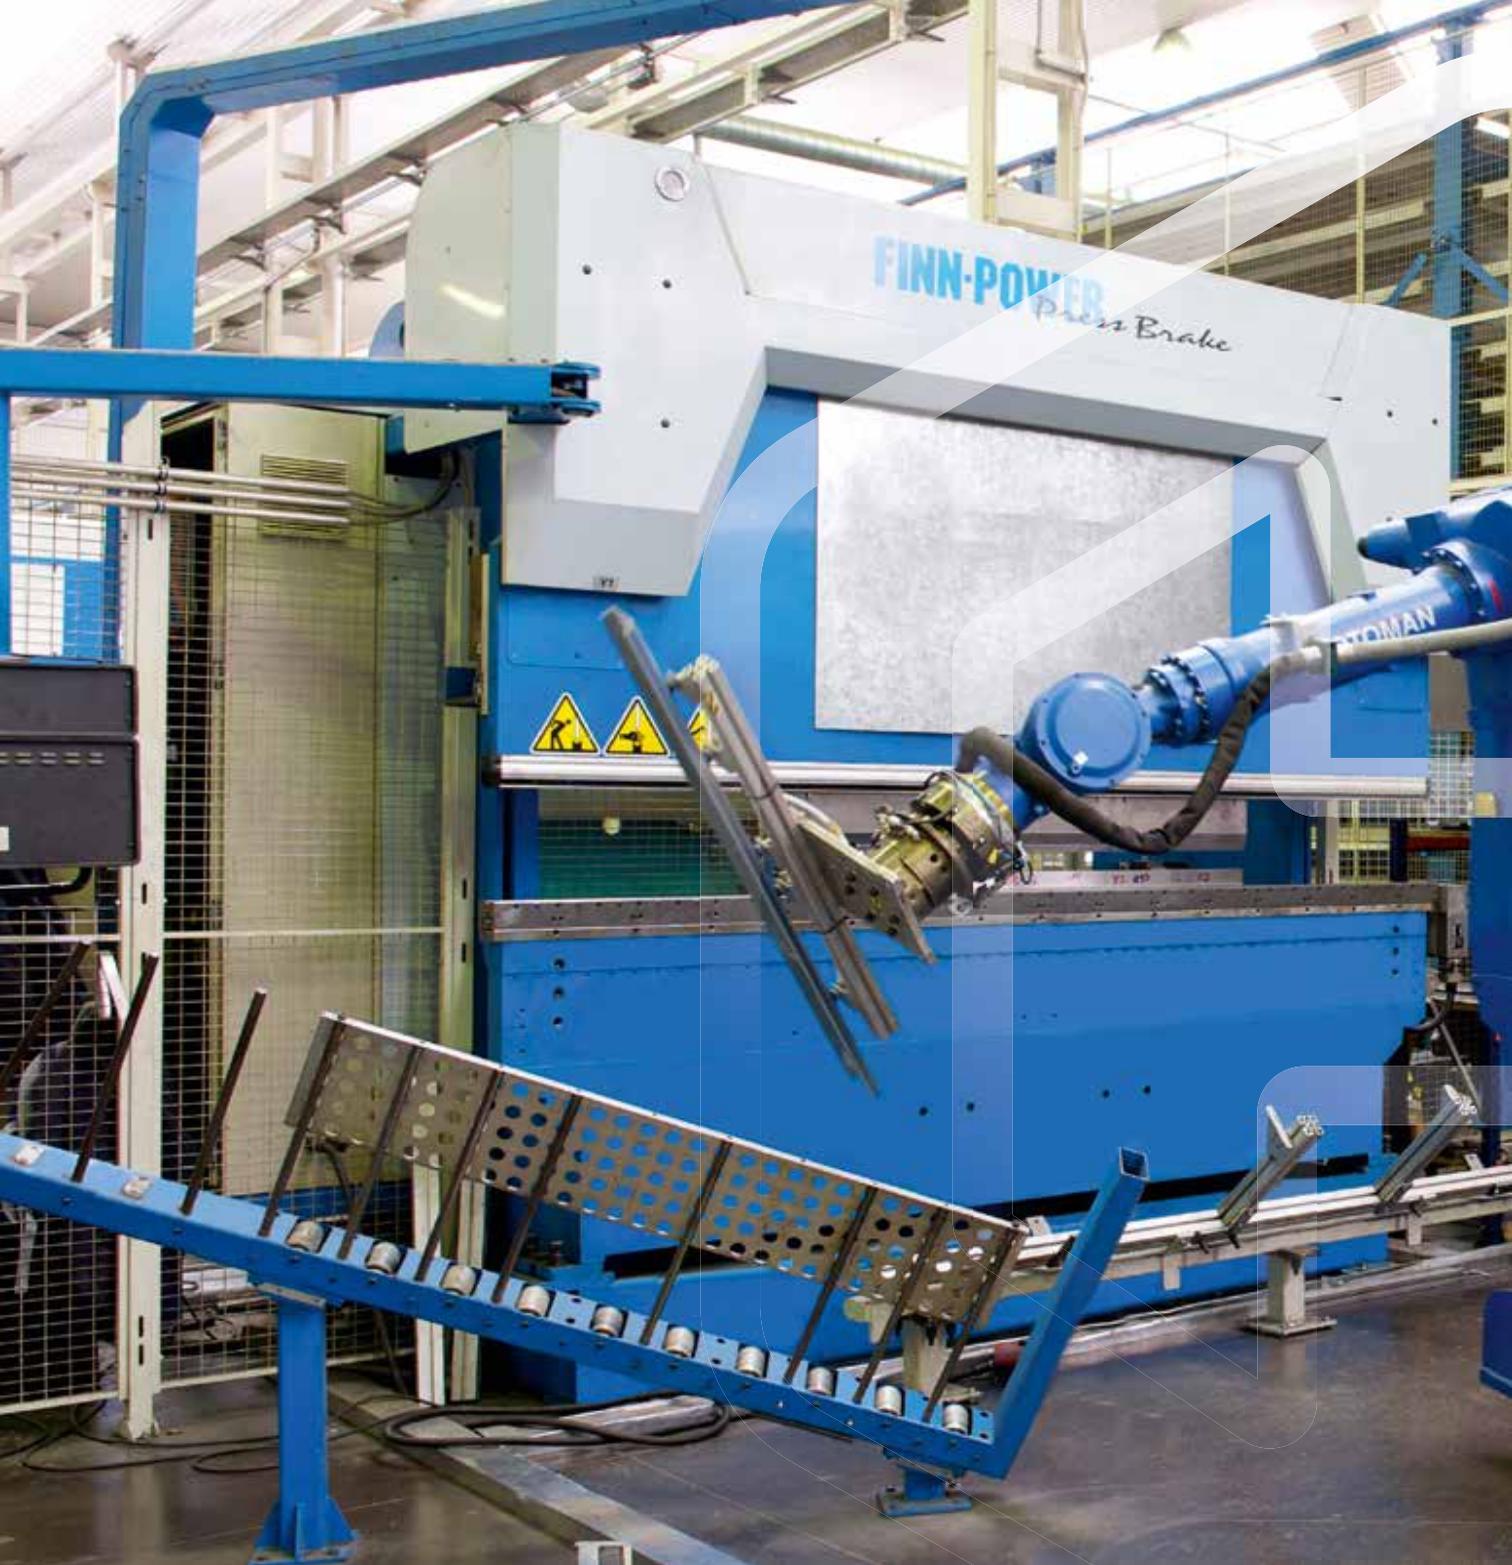

We advise our clients, from the purchase process to the after-sales service.

## International

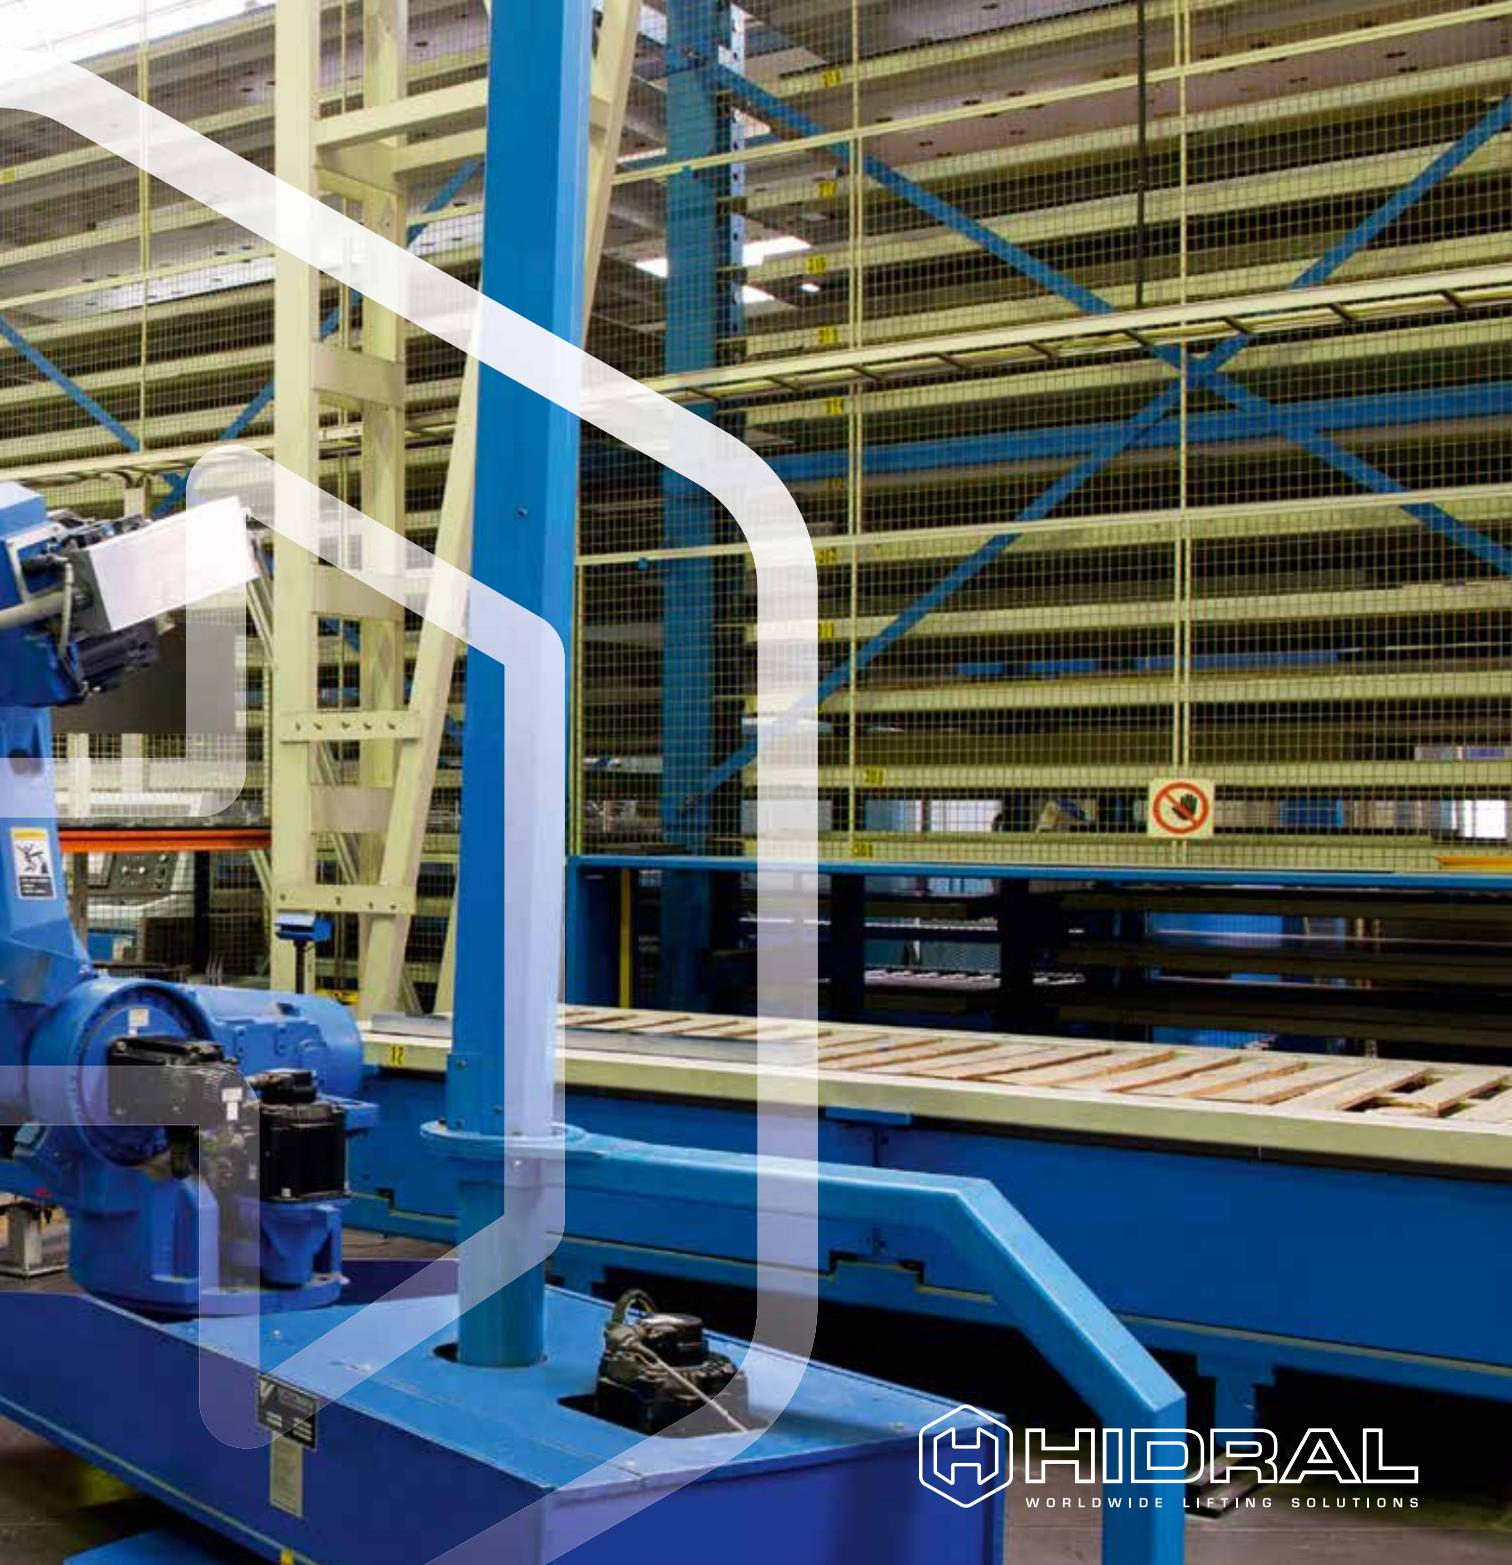

## Products for all your elevation needs

---

Hidral creates customised designs for every need. Innovative solutions that overcome the standard models which satisfy the specific requirements of every customer.

Transport and lifting systems developed to provide a comprehensive service to industrial facilities, logistics centres, hotels, shopping malls, family homes, residential buildings and more.

---

All Hidral projects start from a simple question:

**What would you like?**

I want to rise to the peak. I want to rise quickly. I want to rise safely. I want to go up to the second floor. I want to avoid stairs. I want my order brought down. I want my order brought up. I want to rise without getting out of the car. I want ...

The answers are thousands. The solutions are millions. And there is always a tailor-made product for each customer's needs.

## Goods Lifts

### EH

Use and applications	Model
100-750 Kg	HO*, EH-500
1.000-2.000 Kg	EH-1500
1.000-10.000 Kg	EH/DC-EH/DCL-EH/4C

\*Model HO can be supplied with a speed of 0,2 and 0,3 m/s. These speeds available for the other models are 0,1 and 0,2 m/s.

## Scissors Lifts

### THX

Use and applications	Model
100-5.000 kg	THX
100-2.000 kg	THXX
0,05 m/s	

## Service Lifts

### MH

Use and applications	Model
50-100 Kg	MH
0,35 m/s	

### MTH

Use and applications	Model
200-300 Kg	MTH
400-500 Kg	MTH
	Only available with hydraulic drive

0,2-0,3 m/s 0,3 m/s

## Goods and Passenger Lifts

### EHMix

Use and applications	Model
1.000-2.000 Kg	EHM-1500
2.000-3.000 Kg	EHM/DCL
2.000-5.000 Kg	EHM/DC
0,15 m/s	

### QHG

Use and applications	Model
1.500-6.000 Kg	QHG
0,2-0,6 m/s	

### AH-1600

Use and applications	Model
1.000-1.600 Kg	AH-1600
0,4-0,6 m/s	

## Cars Lifts

### QHV

Use and applications	Model
3.500-5.000 Kg With cab doors	QHV
0,2-0,4 m/s	

### ECH

Use and applications	Model
2.000-3.500 Kg Without cab doors	ECH
0,10 m/s	

## Residential Lifts

### UH | UHe | AH-800

Use and applications	Model
225-400 Kg 0,5 m/s	UH
225-630 Kg 0,5-1,0 m/s	UHe
450-800 Kg 0,6 m/s	AH-800

### DH

Use and applications	Model
225-400 Kg	DH
0,15 m/s	

## Commercial Lifts

### AH-1600

Use and applications	Model
1.000-1.600 Kg	AH-1600
0,4-0,6 m/s	

### QHP

Use and applications	Model
2.000-6.000 Kg	QHP
0,2-0,6 m/s	

## Accessibility

### SH

MODEL **SH200i-SH300i**

Use and applications	Model
225 Kg	SH200i
300 Kg	SH300i
0,10 m/s	

### PH

MODEL **PH-300**

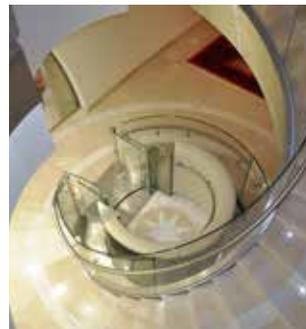

MODEL **PH-400**

Use and applications	Model
300 Kg    0,10 m/s	PH-300
300-400 Kg    0,15 m/s	PH-400

## Especial Lifts

Special projects, fully customised solutions developed at the request of our customers: panoramic lifts, mobile stages for theatres, lifts for heliports or any other type not included in our catalogue.

### Drive

Hydraulic

Electric
